

BART VAN BOMMEL

Independent Field Service & Commissioning Engineer

Keeping Your Production Running

BASE Encarnacion, Paraguay	PHONE +595 994 386555	EMAIL bart@vbfieldservice.com	WEB www.vbfieldservice.com
-------------------------------	--	---	---

PROFESSIONAL PROFILE

Independent Field Service & Commissioning Engineer with more than 25 years of international experience in machinery, industrial automation, packaging, semiconductor equipment and material handling systems.

Packaging machinery is a central part of my background. I have installed, commissioned, maintained and optimized cartoning, case-packing and flow-wrapping equipment, complete production lines and supporting material-handling systems in Food & Beverage and bakery environments. I also understand the packaging-print process through hands-on work with press and plate-mounting equipment.

My strength is becoming operational quickly, diagnosing complex mechanical, electrical, pneumatic and mechatronic faults, and supporting customers through installation, production start-up and performance improvement. I am equally comfortable working for international OEMs, system integrators and end users, independently or as part of a project team.

PROJECT AVAILABILITY

BASED IN PARAGUAY - AVAILABLE THROUGHOUT NORTH, CENTRAL & SOUTH AMERICA

Available for international field service, commissioning, installation, maintenance and troubleshooting assignments.

CORE VALUE

Hands-on technical expertise combined with international project discipline.

Field Service Engineering Independent on-site execution and customer support.	Commissioning & Start-up From mechanical completion to stable production.
Complete Line Installation Machines, conveyors and supporting line equipment.	Troubleshooting & RCA Structured fault finding across multiple disciplines.
Preventive & Corrective Maintenance Reliability-focused interventions and repair.	Machine Optimization Performance, uptime and repeatability improvements.
FAT & SAT Support Structured testing, punch-list closure and handover.	Production Ramp-up On-site support through start-up and stabilization.
Operator & Maintenance Training Practical instruction for safe, effective operation.	Customer Technical Support Clear communication in demanding field conditions.
International Project Support Experienced across cultures, sites and time zones.	Independent Field Execution Quickly productive with minimal supervision.

WHY CLIENTS CHOOSE ME

25+ years of international experience

Directly deployable on complex service and commissioning assignments.

Quickly operational

Understands unfamiliar machines and production lines rapidly.

Strong troubleshooting capability

Efficient analysis of mechanical, electrical and mechatronic faults.

Packaging-industry perspective

Experience with OEM machinery, printing environments and production sites.

OEM and end-user experience

Comfortable with machine builders, integrators and manufacturing teams.

Reliable under pressure

Professional, safety-minded and focused on quality and customer results.

A dependable partner for installation, start-up, troubleshooting and production improvement.

PROFESSIONAL EXPERIENCE

Recent assignments in packaging, printing, automation and material handling.

JUNE 2026 - PRESENT	VB Field Service Freelance Field Service & Commissioning Engineer <i>International contracting</i> Available from Paraguay for international field service and commissioning projects throughout North, Central and South America. • Installation and commissioning of machinery and production lines • Troubleshooting, maintenance and production support • Customer support and training for operators and maintenance teams
JUN 2022 - MAY 2023	Amtor Maintenance Engineer <i>Packaging & printing</i> Maintenance and technical support for printing presses and automated material-handling systems within the packaging and printing industry. • Preventive and corrective maintenance • Mechanical and electrical repairs • Fault diagnosis and production support
JAN 2018 - MAY 2021	Mpac Langen International Field Service Engineer <i>Food & Beverage and bakery packaging</i> International installation, commissioning, service and maintenance of high-tech packaging machinery and complete lines for the Food & Beverage and bakery industries. • Cartoners, case packers and material-handling systems • Projects for clients including Nestle, Grant's, Panasonic and Mondelez • Operator training, machine optimization and technical customer support
JAN 2016 - DEC 2017	Viscon Group Commissioning Engineer <i>Fresh produce automation</i> Installation and commissioning of sorting machinery and material-handling systems within the Fresh Produce division. Completed a nine-month assignment in Canada. • Conveyors, stackers, destackers and shuttles • Sorting robots, strappers and palletizers • Production start-up and on-site customer support

RECENT-CAREER POSITIONING

PACKAGING Cartoning, case packing, flow wrapping and production-line support.	COMMISSIONING Installation, start-up, testing, handover and production ramp-up.	RELIABILITY Troubleshooting, maintenance and performance improvement under pressure.
---	---	--

PROFESSIONAL EXPERIENCE

Earlier international roles across machinery, semiconductor, shipbuilding and telecommunications.

JAN 2014 - JAN 2016	VB-Tech Freelance Field Service Engineer <i>Machinery & industrial automation</i> Own business providing freelance field service and commissioning within machinery and industrial automation. • Installation, commissioning and service • Independent execution of international technical projects
NOV 2010 - NOV 2013	AV Flexologic International Field Service Engineer <i>Flexographic printing</i> Worldwide responsibility for installation, commissioning, maintenance and service of plate-mounting machines for the flexographic printing industry. • Coordination and supervision of local engineers • Instruction and training for operators and service engineers • Technical support at international customer sites
FEB 2009 - AUG 2010	IHC Parts & Services International Field Service Engineer <i>Shipbuilding</i> Repair, service and commissioning on various types of dredging vessels and at international shipyards. • Shipyard overhauls on trailing suction hopper dredgers for Van Oord and Boskalis • Work at IHC and Damen Shipyards • Commissioning of cutter suction dredgers: engines, hydraulics, electrical and mechanical systems
JAN 2007 - DEC 2008	Besi / Fico Singulation International Field Service Engineer <i>Semiconductor</i> Lived and worked in Taiwan for two years in the semiconductor industry. Installed, commissioned and serviced high-tech singulation and sorting machines. • Cleanroom assignments at major semiconductor manufacturers • Training of operators and local service engineers • Experience with pneumatic control systems, precision mechanics and semiconductor processes
2001 - 2006	Nemesys Telecommunication Service Engineer - Data & Telecommunications <i>ICT & telecommunications</i> Installation and programming of business telephone exchanges and data and telecommunications equipment. • Training and instruction for end users • Developed strong knowledge of ICT, telecommunications and data systems
2001	Nortel Networks Service Engineer - Data & Telecommunications <i>Network infrastructure</i> Installation and testing of telecommunications equipment, fiber-optic, coaxial and UTP/CAT-5 cabling systems at sites in the Netherlands and Belgium. • Worked in local exchanges and data centers for clients including KPN, T-Mobile, Telfort and Tele2
1996 - 2001	Protel Telecommunicatie B.V. Service Engineer - Data & Telecommunications <i>Business communications</i> Installation of business telephone exchanges, telecommunications equipment and corporate networks. • Installation and termination of UTP/CAT-5 cabling • Telephony, ICT networks and fire-alarm systems • Patch cabinets and panels

International project experience across Europe, the Americas, the Middle East and Asia.

TECHNICAL PROFILE & QUALIFICATIONS

A multidisciplinary background built around field execution, packaging machinery and production reliability.

PACKAGING & PRODUCTION SYSTEMS

- Cartoners, case packers and flow-wrapping machinery
- Complete production-line installation and integration
- Conveyors, material handling, sorting and palletizing
- Production start-up, ramp-up and machine optimization
- Packaging-print and plate-mounting equipment

ENGINEERING & DIAGNOSTICS

- Mechanical, electrical, pneumatic and mechatronic fault finding
- PLC-controlled machinery
- Servo systems, motion equipment and fine mechanics
- Reading electrical, mechanical and pneumatic drawings

INDUSTRY EXPERIENCE

Packaging & Bakery	Food & Beverage	Flexographic Printing	Automation
Material Handling	Semiconductor	Fresh Produce	Shipbuilding & Telecom

CERTIFICATIONS

- Siemens S7-1200/1500 TIA Portal
- ROVC Basic Electrical Engineering
- ROVC Electrical Switching
- ROVC Hydraulics

EDUCATION

1994 - 1996 | Senior Secondary Vocational Diploma (MBO), Mechanical Engineering

1992 - 1994 | Lower Vocational Diploma (LBO), Mechanical Engineering / Structural Metalwork

LANGUAGES

Dutch | Native

English | Fluent, spoken and written

Spanish | Basic, actively learning

INTERNATIONAL REACH

- Projects across Europe, North, Central & South America, the Middle East and Asia
- Lived and worked in Taiwan; long-term assignment in Canada
- Based in Paraguay and available throughout the Americas
